最新消息：

各位基層同仁大家好：

時間過的很快，又到了要準備開年度會員大會的時刻。去年腎臟醫學會改選理監事，因位基層同仁力量的凝聚，讓三位基層醫師進入理監事會，使得腎臟醫學會更重視基層的心聲，和基層透析協會有更密切的互動和合作。今年的基層透析協會年會，感謝陳鴻鈞理事長大力支持，讓我們能和腎臟醫學會同日同地點舉辦。12月14日(星期日)上午十點，先舉行基層透析協會會員大會。我們再度邀請健保署醫管組林阿明組長與會，也邀請陳鴻鈞理事長共同列席，和會員座談國家透析政策走向。林阿明組長是目前健保署透析政策制訂最重要的幕僚，大家可就此機會表達基層透析院所經營的困難處，相信更多的溝通，一定有助於爭取合理的透析預算。當天下午兩點到五點，學會特別安排一基層透析研討時段，我們規劃了三個主題，都是和基層診所的經營有密切的相關。第一個主題是「如何避

免腎友住院及死亡」，將邀請資深學長為大家說明各項要點來避免腎友住院與死亡。第二個主題是「透析診所的經營」，除了血液透析治療外，一般門診、腹膜透析及其他可執行的醫療業務，將會做深入探討。第三個主題是「基層透析診所護理人員教育訓練」，我們將委託腎臟護理學會，邀請資深診所護理主管來介紹如何訓練護理人員。以上三個主題對我們基層診所經營都非常實用，期望我們基層同仁都能踴躍出席，參與討論。

12月14日	主題	主講人
10:00-11:00	會員大會及健保政策座談	鄭集鴻理事長 陳鴻鈞理事長 林阿明組長
14:00-14:50	如何避免腎友住院及死亡	主講人： Moderator
15:00-15:50	透析診所的腎友一般門診申報研討	主講人： Moderator
16:00-16:50	透析診所的護理人員訓練	主講人： Moderator

隨函附上鈣磷平衡衛教海報，這是由賽諾菲公司贊助刊印，內容經過協會校勘，並以協會名義提供各院所張貼，若需更多張數者，請與協會連繫。

祝大家 平安健康

事業順利

理 事 長 鄭 集 鴻 敬 上

學術專欄：

US DOCTOR WITH EBOLA IN ATLANTA FOR TREATMENT

By [RAY HENRY](#) and [MIKE STOBBE](#)— Aug. 2, 2014 10:08 PM EDT

An ambulance departs Dobbins Air Reserve Base near Interstate 75, Saturday, Aug. 2, 2014, in Marietta, Ga. Officials at Emory University Hospital in Atlanta expect an American that was infected with the Ebola virus to be transported today. (AP Photo/John Bazemore)

<http://bigstory.ap.org/article/us-aid-workers-headed-atlanta-ebola-care-0>

要怎麼樣有信心的醫療團隊，有把握這病毒不會從醫療人員的手中逃脫，敢接手救治這高達 80% 致死率的傳染疾病？

要怎麼樣的國家人民，敢把這有極度傳染風險的本國病人，運送回自己的國家嚐試不一定有效的治療？

雖然有反對的聲音（如以下），但是這國家的主事者還是做了，真是有 guts！

The U.S. Centers for Disease Control and Prevention has received "nasty emails" and at least 100 calls from people saying "How dare you bring Ebola into the country!?" CDC Director Dr. Tom Frieden told The Associated Press Saturday.

以下這句話，就是美國國家對自己人民的人道關懷，難怪一堆人拼命想拿到綠卡，這是有道理的，因為國家真的會照顧你，反觀我們呢？

"I hope that our understandable fear of the unfamiliar does not trump our compassion when ill Americans return to the U.S. for care," Frieden said

地點背景介紹：

- 1) Emory's isolation unit for infectious diseases, created 12 years ago to handle doctors who get sick at the CDC
- 2) In 2005, it handled patients with SARS, which unlike Ebola can spread when an infected person coughs or sneezes.

如果得了這幾乎是不治之症的疾病，唯一可能有效的治療是來自治癒者的血清（為了感謝醫師救活他而捐出的血），是怎樣的情操，能把這活命的機會讓給同事？

There are experimental treatments, but Brantly had only enough for one person, and insisted that his colleague receive it. His best hope in Africa was the transfusion of blood he received including antibodies from one of his patients, a 14-year-old boy who survived thanks to the doctor.

令人讚嘆的國家和人民。

後記：這裡有幾張照片值得一看，令人感傷

Children who have a sick family member in the isolation ward eat a prepared meal. While the children have no symptoms, they are being housed in the same areas as those who are exhibiting signs of Ebola infection.

John Moore/Getty Images

A sick child was carried from the center as the crowd watched. Many in the crowd said they believe the Ebola epidemic is a hoax.

John Moore/Getty Image

A burial team from the Liberian health department prayed before entering a house to remove the body of a woman suspected of dying of Ebola. Workers wearing

protective clothing are retrieving bodies from all over Monrovia, the capital, where the spread of the highly contagious virus has been called catastrophic.

A worker disinfected the body with a chlorine bleach solution before it was removed from the house.
